Collaboration tools have made communications faster and easier. However legacy applications make accessing important information hard because they are randomly scattered into a long thread.

iCollaborate is here to change that experience and ease the communication while injecting structure so that team doesn't lose valuable information in the thread

ollaborate

ICHAT

Group and individual chats

Set up one-on-one chats or use group chats to create focus areas and breakouts to simplify and organize collaboration

iChat Emojis

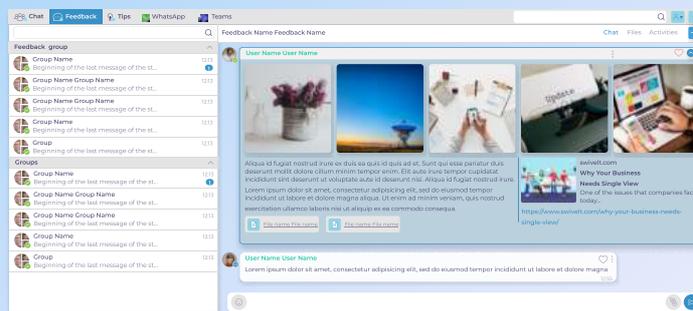

Emojis are now available on iChat. Simple right click and pick the Emoji menu and express your emotion to enhance your message while you collaborate.

Quick Chat

Get notifications on your desktop or mobile device and send immediate responses without having to flip to a different screen

FEEDBACK

Get the feedback

Every post can be liked and commented to make sure feedback is clear and / or enhanced with the crowd's feedback

Share your thoughts

Whether it is one on one or to a group of team members, Feedback lets you share your thoughts and information (attachments, Links, images, etc) instantly with your team.

This isn't a flat one-way channel, rather it creates a focused forum to drive engagement.

Now you can have one location for your 1:1's, announcements, discussions, and any other topic that moves from flat communication to a rich and engaging collaboration

Set permissions

Set up private threads and discuss specific topics without disturbing other teams.

A great location to handle those sometimes-sensitive topics that you need to document and acknowledge

TIPS

Make sure everyone is aware

To keep your knowledge center growing, individuals are instantly rewarded and acknowledged. Plus, a notification goes out to everyone to drive engagement with a newly posted Tip.

Now knowledge sharing can be fun, rewarding and very visible so you get the right impact on your business

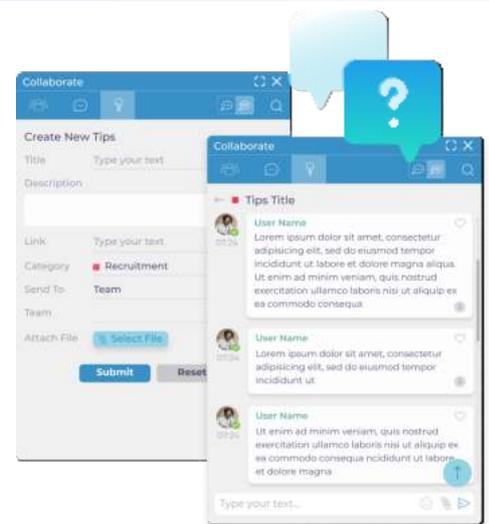

Always on Knowledge and Innovation

Tips creates an instant knowledge center and allows you to set-up categories to instantly keep knowledge and innovations organized. The search feature lets team members quickly get to the help they need

Keep it simple

Open your organization to cross team and organization wide knowledge sharing.

There are lots of good ideas and working practices in each team member's hands that if unleashed would increase your business results. Tips lets anyone share their knowledge or Innovations; 1:1 or to groups of team members, into a forum that drives engagement and enrichment of knowledge sharing with the crowd's input

Part1

Not just another legacy HR management system. In addition to the typical HRMS features, iPeople automatically connects to all the business modules to give a real time view of performance, behaviours and the tools to motivate and reward your employees

People

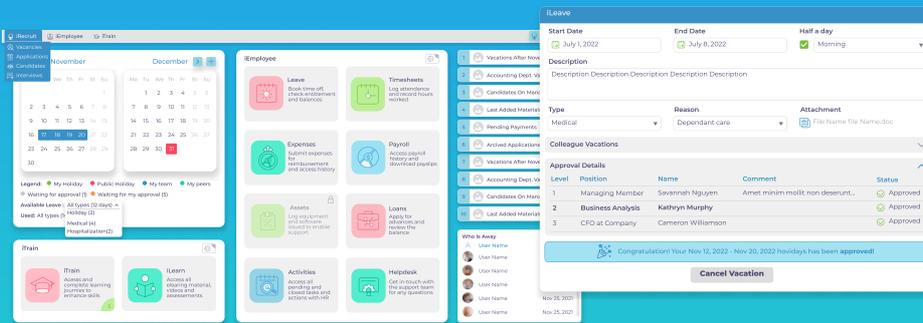

HRMS SECTION

Get a 360-degree view of all your employees to gauge interactions, effectiveness, performance and collaboration. Plus, manage all your HR related activities including connecting them to projects, business performance and other company operations

Leave Management

Manage all types of leaves, tailor to roles and countries, set your approval flow, manage requests and get a clear and simple view of balances

All Employee Data

Capture all the information on your employees and use the various features to set periodic reviews, issue documents and manage all your communications

Employee Journeys

Create different journeys that can be used to digitise your people processes and ensure you can quickly assess the readiness. Journeys can be on-boarding, off-boarding, reviews, learning and development and much more

Recruitment Management

Manage your full recruitment process and make it easy to convert candidates into employees with minimum administrative effort. Link your collection of information directly to iPeople to build up the candidate base so you can tap into that pool to help speed up hiring

Expense Management

Setup your custom expense management process and capture all the receipts and payment history

TREE MAP

See an entire organization on one screen with the ability to access teams' and individuals' performance, reporting lines, designations, contact details, direct chat, and even voice call functionality

Click to interact

Find people you need in the Treemap and email, chat or call them with just a click

Side by Side Performance

Flip a switch and see side by side performance that lets you structure the view by regions, countries, groups and teams

Hierarchy view

Entire organization chart with all the lines of reports, teams, departments regions, and countries divisions

BEHAVIOR MECHANICS

Combine Targets with Gamification, AI, Incentives and Recognition and you have the tools for behavioural mechanics at your fingertips. Use the mechanics to design, tweak and steer your teams to the desired outcomes

Trigger Mechanics

Set up triggers based on your targets and employees' behavior to steer their performance

Motivation

Motivate your team with trophies, badges, star ratings and real monetary rewards based on triggers and team achievements

Behaviours Settings

Track that teams and individuals are doing the key things that will make them effective, beyond targets. Things like getting task done on time, managing workload, interacting well, sharing knowledge, using tools and more

Mood Tracking

Keeping a team performing at their best means looking beyond the numbers and influencing how they feel every day. Now you can always have a pulse of your team mood and use the tools in iStrives to keep them focused and motivated

Excited to start growing your business?

Not just another legacy HR management system. In addition to the typical HRMS features, iPeople automatically connects to all the business modules to give a real time view of performance, behaviours and the tools to motivate and reward your employees

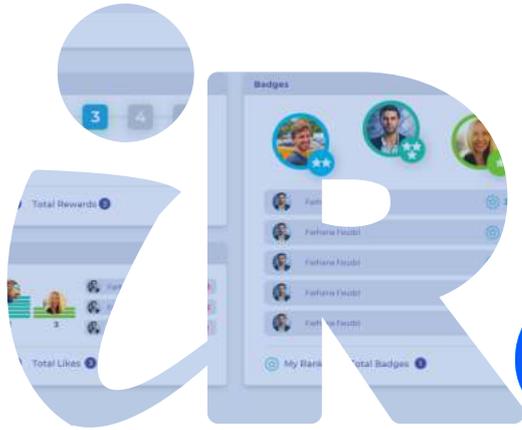

People

Part 2

Time and Motion

Not only track login and logout but get a complete view of how time is spent as different tools are used in iStrives. Powerful tool to optimise operations and steer individuals towards productive time

The screenshot displays the iStrives HR system interface. The main view is a calendar grid for timesheet management, showing hours worked for each day from January to March. A '17 March, 2022 Working Hours' pop-up window is open, showing a list of working hours with status indicators (Online, Busy, Lunch) and a 'Submit' button. Another 'Approve January Timesheet' pop-up window is also visible, showing a date range selector and a 'Submit' button. A third 'Approve User Name Working Hours' pop-up window is open, showing a table of user names, total hours, and date ranges, with 'Approve' and 'Reject' buttons. A pie chart in the bottom left corner shows the distribution of user statuses: Online (green), Lunch (blue), and Busy (red). The bottom of the interface shows a list of users with their names, project assignments, and total hours worked.

iRewards is an entirely new approach to team incentivization
It uplifts motivation to a different level from instant recognition and provides you with an extensive toolkit of nudge mechanics, gamification, rankings, and many more tools to drive business outcomes

Rewards

DIGITAL REWARDS

Trophies

Set up a healthy competitive environment and motivate your teams to strive for better results and feel valued for achievements by getting new trophies into their digital collection

Levels

Set multiple mastership levels to see who is an expert and who still needs some assistance. Reward team members with new levels for different outcome criteria and motivate them with this public recognition of their competence

Badges

Give badges to your warriors for daily victories. You're in control to set the criteria for issuing badges so that badges become a 360-degree reward system for performance, behaviors, collaboration, knowledge sharing, etc.

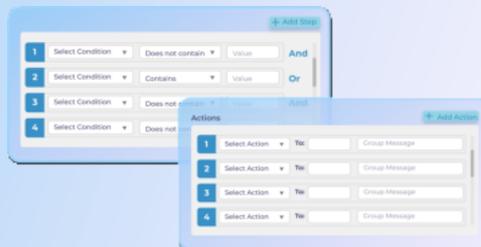

STAR RATING

See Top Performers

Star ratings measure consistency of performance and allow you to quickly compare performance across an organization irrespective of the actual metric you're using between individuals and departments.

Let everyone see who is a real star in your team

Drive Motivation

Set specific targets for each team member or the whole organization and give a clear visual of how successful they are with a star rating

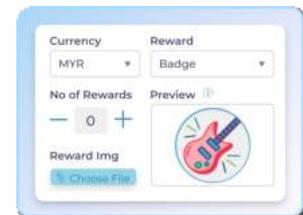

Triggers Engine

Set up triggers nudging the team members when the star rating drops below the benchmark.

Make people aware of what they need to do to increase the number of stars.

Get notified when someone is underperforming and take timely actions in the early stages

MONETARY REWARDS

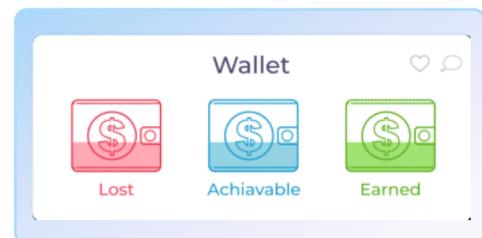

Exchange Value

Introduce pay-for-performance for every role in your business as well as partners and suppliers. Convert performance into pay rather than have flat payment structures for everyone other than sales

E-Wallet

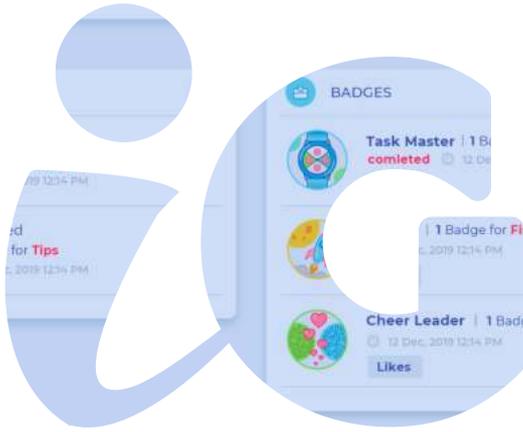

Flexible tool to spread payments across 1 or multiple metrics and link payment values to the outcomes so that you can penalise any misses in SLAs and/or targets

E-Wallet Gauge

Always on visual to see how much has been earned, can be earned or has been lost

A powerful tool to drive everyone to take their own actions to make their scorecard all green

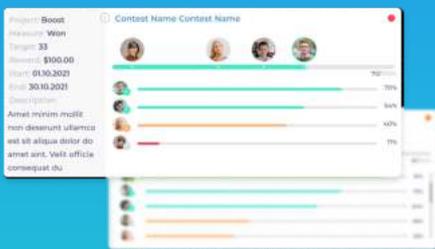

Let the team change the game and win it by equipping them with leader boards, badges, notifications, competitions, and rewards

gamify

GAMIFICATION

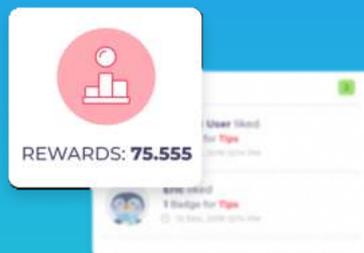

Sustain the Competitive Spirit and create a highly motivated team with instant recognition of their performance as it happens, not weeks later...

Contests

Make performance fun, set up contests to get an individual or teams focused on new or existing priorities.

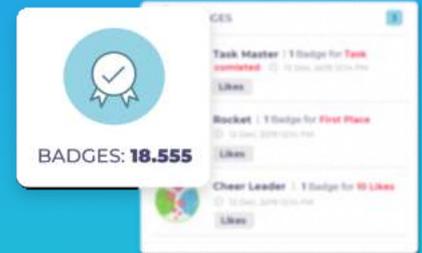

Run competitions either ad hoc or periodically, they are a flexible tool to ensuring you achieve the right outcomes

Rewards

Reward and motivate your rock stars so that they continue to shake and move your business straight to success.

Share your love not only by big rewards but also via small acknowledgments every step towards the big goals

Badges, Trophies, Levels

Reward team members with badges, trophies, and new levels of mastership each time they accomplish tasks with increased complexity plus keep them motivate with instant public recognition of their performance

LEADER BOARDS

Always-On stack ranking of performance that you can interact with by sending your comments or "like" what you see

Progress Track

See the overall achievements or drill down to a specific metric to see how it compares to the top three performers

Leaders Dashboard

See full stack ranking of all team members linked with the progress track so that you can see a leader board for overall performance as well as individual metrics.

Click "View All" to see everyone's stack ranking

Every Element

For every element you can see the leader boards not just for metrics, but also to assess "behaviours" that let you know if a team or individual is doing the right things to improve / sustain outcomes

Put information at the fingertips of your team so it is easy to access what they need for their role; useful links, business materials, knowledge base and all other resources

oolbox

Customization

Make it your own. Add multi-layers of folders, set different colour schemes and icons for every folder and link. Brand the look and feel of your shared space

Quick links sharing

Make it easy for your team to get all the links they need to easily navigate your organization

Document Storage

Build a role-based storage and filing system to give teams what they need to be successful and productive

Process & Procedures

Now you can be sure that everyone can get to the right process and procedure for their role

Videos and Images

Add all your business videos and images to create a media rich knowledge centre

In App View

Just click on documents, videos, images, etc to view the content without having to jump to another tool

Access Permissions

Decide who can access different files in your drive by settings permissions for teams, roles and individuals

Forms & Content

Put those key forms and content into your toolbox to ensure everyone is using the latest versions

Notify

Notify teams of new uploads you want them to review and use

There is always a lot of things to do in the business and tracking your tasks can get complicated. iStrives task management makes it quick and easy

to manage to-do-lists, set activities and actions for the whole organisation.

tasks

Simple Assignment and timelines

Assign tasks to one or many team members. iTask automatically duplicates the task so you can see individual status progress

Right level of detail

Simple set of details so that the tasks can be set up quickly and within the desired timeframe, share attachments, comments and monitor the progress history so you can audit those sensitive tasks

The image displays three screenshots of the iStrives software interface. The top screenshot shows a 'My tasks' view with a list of tasks, each assigned to a team member. The middle screenshot shows a Kanban board with columns for 'IN PROGRESS', 'ON HOLD', 'CANCELLED', and 'COMPLETED', with tasks being moved between these stages. The bottom screenshot shows a 'Status Dashboard' with a grid of progress indicators for various tasks.

Status Dashboard

A quick summary of the progress of all tasks at a glance and quick filter to get the view of different status

Multiple View Options

Switch between list and board view options to get the most suitable structure for your task management style. Update tasks statuses by dragging and dropping them from one Kanban column to another

Connect External Data

API connection to other task tools to allow a single view of all tasks and enable two-way updates when working with external parties or systems

Approvals

Set rules for approvals to manage task assignments

Data Import

Import data from 3rd party solutions via CSV upload or API connection

Excited to start growing your business?

Then contact us today:

iHive is your tool for pushing internal and external information feeds to your teams. Push news on your customers, industry, competitors, regulations, etc. Plus extend your feeds to cover blogs and jobs to reduce your teams time hunting on the web

ive

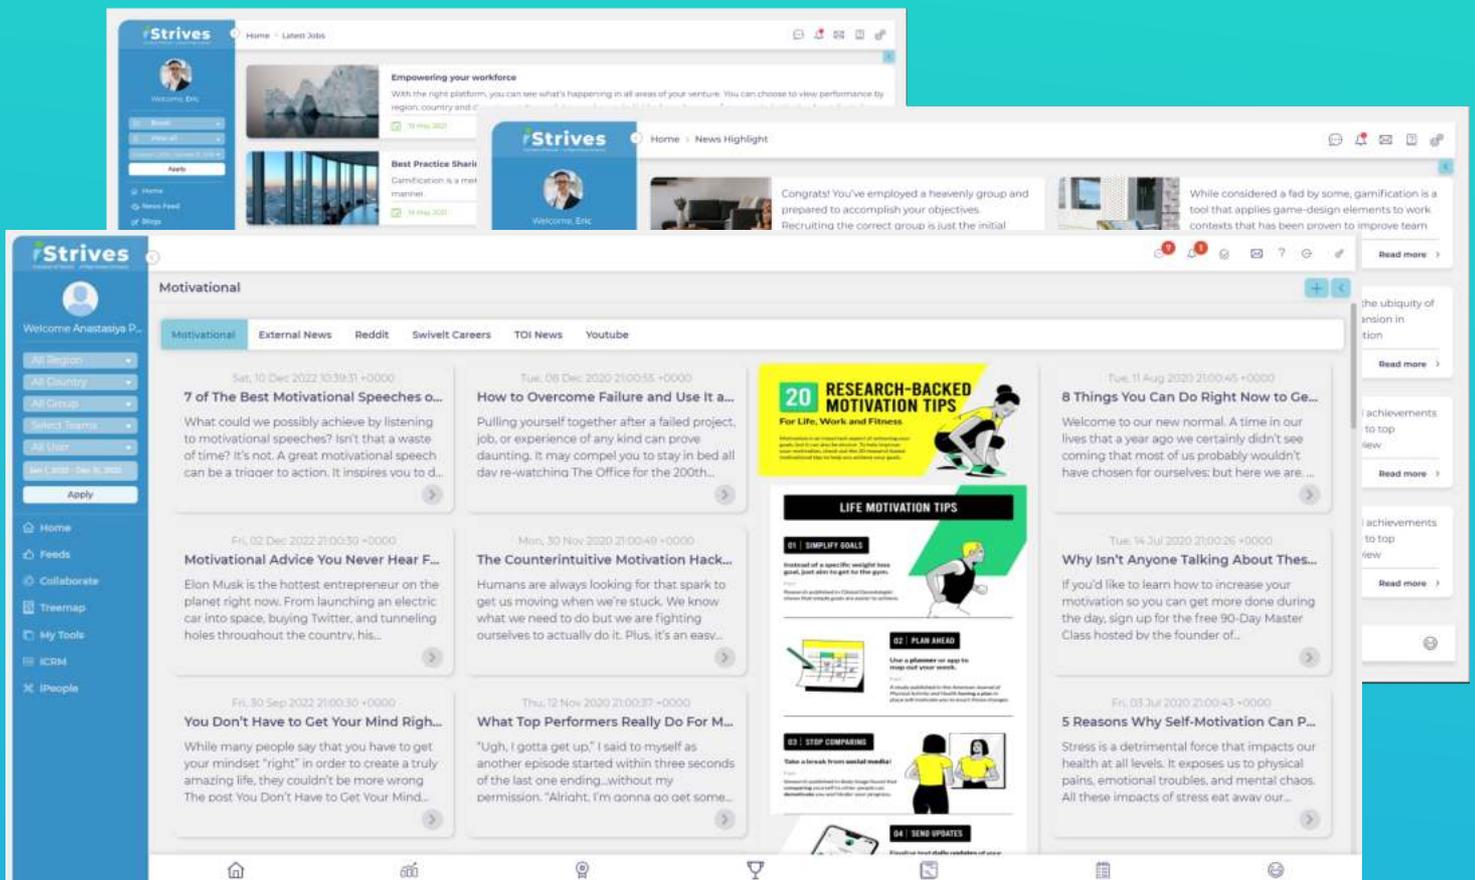

Custom Role View

Create your feeds by role in your organisation so that what they see is relevant and helps drive productivity

Blogs, News, Careers

Tailor your feeds to include your internal information like your company blogs, News and even jobs so that your team is focused on growing in your company

Unlimited Feed Boards

You can create as many board feeds that you need so that it is quick and easy to find information

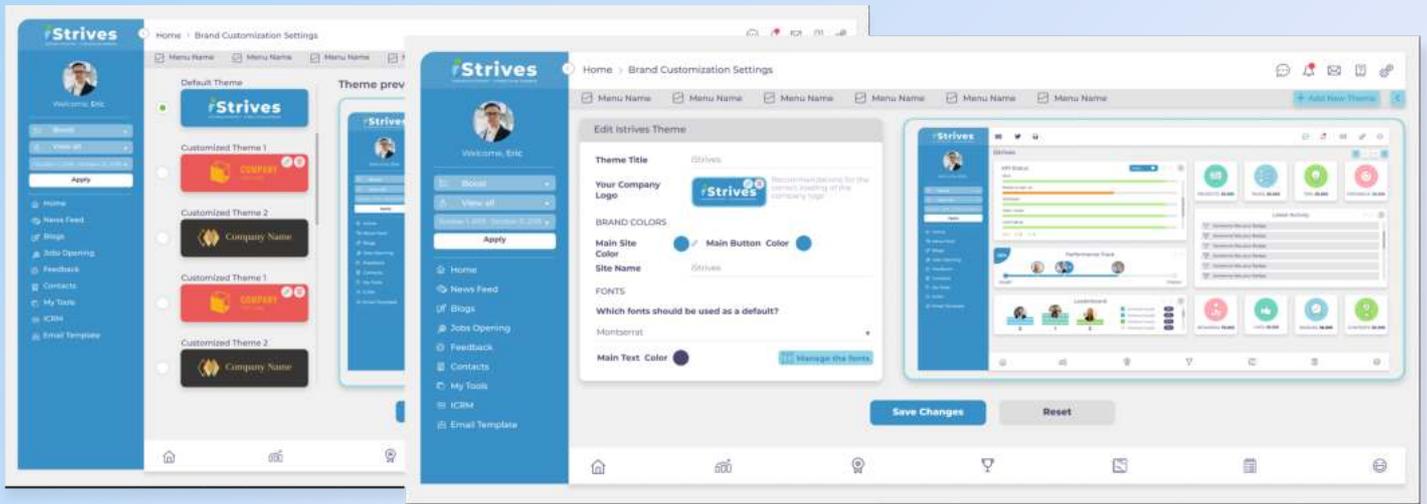

Posting and Sharing

Use this feature to create buzz in your organisation and interact with each other on general events and activities that are going on across the company

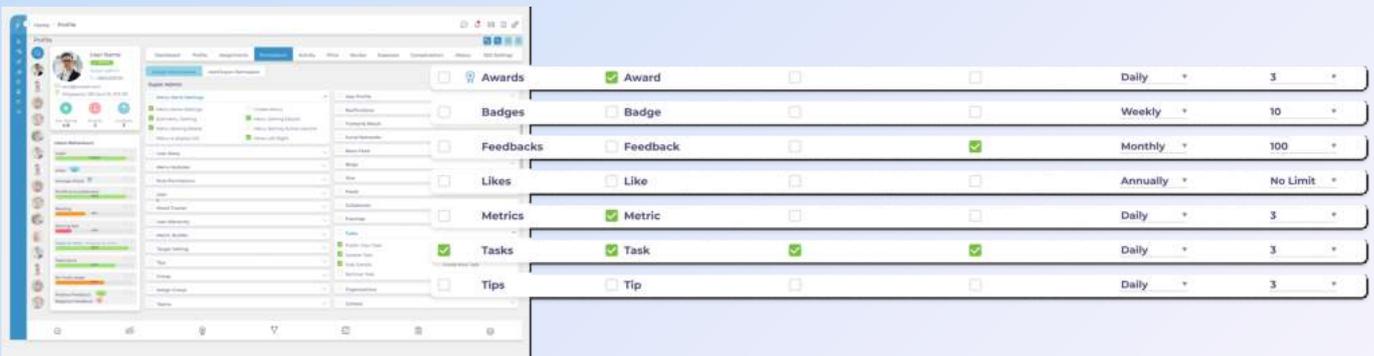

The philosophy of iStrives is to reduce the need to swap between multiple applications and create interconnectivity between different work aspects so productivity is maximised. In some cases, there is a need to keep external tools/applications so we have developed a toolbox that allows iStrives to establish two way connection with external applications that are, from a user perspective, an integrated part of iStrives so that they get a single simplified work experience

Custom

Custom Field Layout

When setting up the connection, you are in full control of the layout so that you can either mirror the layout of the original application or enhance the layout to suit your needs

Custom Field Selector

Pick and choose which fields you would like to have visible in the application. No need for new permission settings as our SSO feature ensures users are logging into the source tool (automatically) under their application ID so that the permission setting in the source application will apply

Onion Skin Integration

iStrives places an Onion Skin over an external application to make the application an extension to iStrives so that you can use all iStrives performance mechanics and click-to-action features even on external tools

Single UI Experience

A single UI is a powerful tool to keeping teams productive. Now you can simplify the experience for your teams and make it feel like they are using a single application

Two Way API Control

Our two-way API connection will allow a user to make updates directly into the external application and see changes as and when they happen

Put analytics capability at everyone's fingertips rather than a select few in your organisation. This powerful tool allows all the data connected to and generated by iStrives to be turned into visuals to identify trends and opportunities to improve decision making at all levels.

Dashboard

Now you don't need a separate BI tool

Dashboards

You are in full control to create as many dashboards as you need so you can get a clear view of department, individuals, suppliers and partner performance and outcomes. Make private dashboard as well as public dashboards and don't worry: your permissions settings control what each person sees

Trend Charts

Trend charts are available at all levels and help to quickly understand if your leading and lagging indicators are heading in the right direction. With iStrives you can instantly interact with the trends to kick off any actions and/or send out positive messages to keep everyone motivated

Business Analysis

Combine data points and metrics to go beyond trends into analytics to make decision making easier

Export Intelligence

Each graph has an export function so that you can quickly access the raw data or simply reuse the visual for business updates and communications

iStrives platform has many tools that allow you to optimize and speed up interaction with customers, employees, and improve your experience of using the application to solve other business problems.

Optimize

CURRENCY PREFERENCE

All currency values in the Employee module are displayed based on the user's preferred currency however, the currency toggle switch enables users to switch and view the stored values in a different currency or reset back to the original currency as required

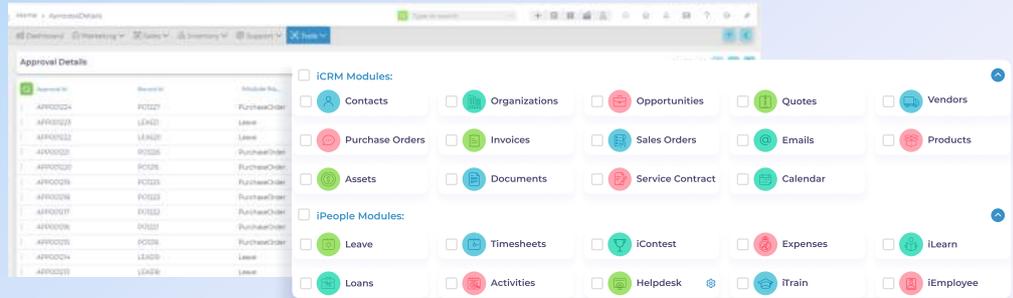

NOTIFICATIONS

This tool will allow you to keep abreast of all your activities and your team. Convenient filtering by modules and quick actions will allow you to get acquainted with the latest changes in just a few seconds. In the application header there is a calculator with the number of unread notifications.

APPROVAL PROCESS

This feature allows the admin or managers to determine which processes must go through the approval process, the indicators that will trigger this process and the different levels of approvals that a certain process must go through. This setup can be done for all modules in iCRM

Notification for approval list

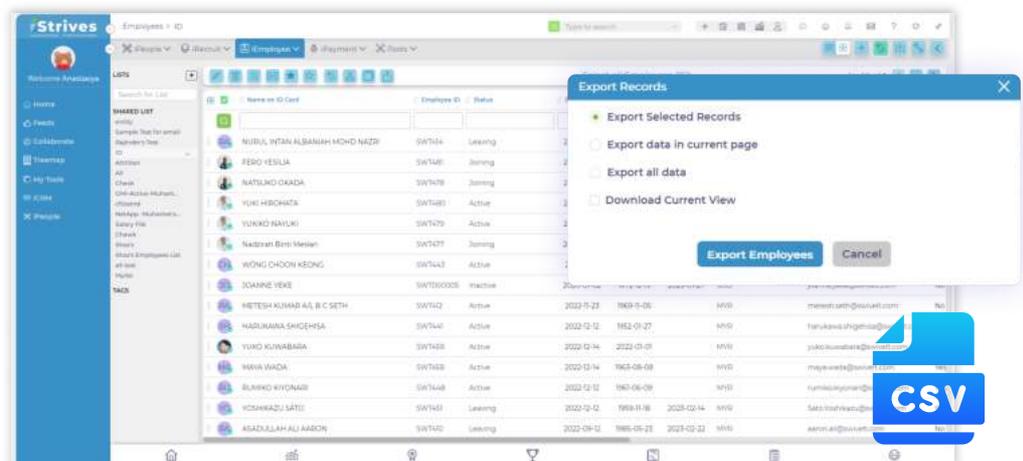

You're able to receive most fresh information and last updates about approvals, that you have interest in. Just click to approval counter and receive all information you need about your or your teams approvals.

No limits

Plenty of fields, tasks and activities can be approved all over the platform. Feel free to manage workflow processes exactly the way you need.

EXPORT OPTIONS

Multiple choice

iStrives allows users to export data in a csv format. Users can pick from exporting selected records, records in the current page, all records or the current view, which means users filter, and sort data as required in the system then export the filtered records in a csv format
