iTasks

There is always a lot of things to do in the business and tracking your tasks can get complicated. iStrives task managementmakes it quick and easy to manage to-do-lists, set activities and actions for the whole organisation.
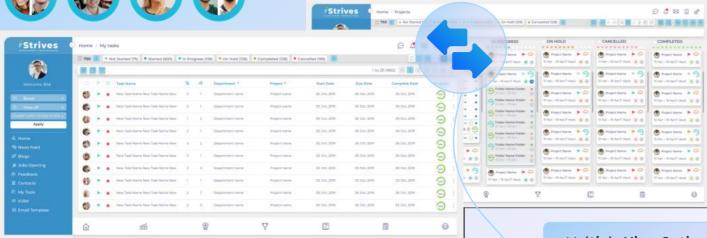

Simple Assignment and timelines

Assign tasks to one or many team members. iTask automatically duplicates the task so you can see individual status progress

Right level of detail

Simple set of details so that the tasks can be set up quickly and within the desired timeframe, share attachments, comments and monitor the progress history so you can audit those sensitive tasks

Multiple View Options

Switch between list and board view options to get the most suitable structure for your task management style
Update tasks statuses by dragging and dropping them from one Kanban column to another

Status Dashboard

A quick summary of the progress of all tasks at a glance and quick filter to get the view of different status

Connect External Data

API connection to other task tools to allow a single view of all tasks and enable two-way updates when working with external parties or systems

Approvals

Set rules for approvals to manage task assignments

Data Import

Import data from 3rd party solutions via CSV upload or API connection
